Case Study

How did NexAEI's GPS-based Attendance and SAP S4/HANA Integration

Transform the Outdoor Attendance Capturing

of a Leading Indian Tyre Manufacturer?

In Short:

Backed by a workforce of around 19000 employees, this leading Indian tyre manufacturer has its umbrella spread over 100 nations. The organization is committed to driving progress taking responsibility.

The organization was managing its outdoor and on-premise employees' attendance via business registers across 12 nations. Thereafter moving the data to excel and then getting the attendance system updated was becoming painful.

NexAEI's attendance capturing mobile application has solved the said issue with its GPS-based outdoor attendance feature. It has also integrated with the organization's SAP S4/HANA application for rendering a hassle-free and centralized attendance management system.

The Requirements They Had:

- A GPS-based centralized attendance capturing mobile application
- Integration of the app with SAP S4/HANA application

The Solution We Offered:

- GPS-based outdoor attendance capturing feature for the outdoor white collar sales employees to mark attendance using their smartphones
- Device registration for dual authentication and in-app user consent form based on GDPR for data protection and privacy
- App integration with SAP S4/HANA for centralizing employee data
- In app multi-lingual support for providing uninterrupted support to the users across 12 nations

The Value Delivered:

- Seamless outdoor attendance capturing of the white collar sales employees via mobile application and increased transparency among teams
- Centralized organization-wide attendance data viewing as a result of the software integration with SAP S4/HANA
- Multi-lingual app support for easy operation of the organization's global user base
